Alyeska named one of World's Most Ethical Companies, third year in a row

The Ethisphere Institute has recognized Alyeska Pipeline Service Company as one of the World's Most Ethical (WME) Companies for the third year in a row. The institute announced its selection today at the 2014 WME Honoree dinner in New York.

"Alyeska employees and contractors earned this recognition by a commitment to ethics and integrity that extends beyond formal policy – it is an integral part of the TAPS culture," said Tom Barrett, Alyeska Pipeline Service Company President.

Alyeska is recognized for demonstrating:

- Strong and consistent safety and environmental record.
- Sustainability initiatives designed to extend the life of the pipeline and protect the environment.
- Established policies and procedures that foster ethical behavior.
- Corporate citizenship programs, including the annual United Way campaign, school partnerships and matching employee philanthropy contributions.
- Excellent code of conduct and an open work environment that encourages employees to raise concerns and identify company improvements.
- Direct lines of communication between the workforce and leadership.

The World's Most Ethical (WME) Companies designation recognizes companies that go beyond making statements about doing business "ethically", and translates those words into action.

The Ethisphere Institute is an international organization dedicated to the creation, advancement and sharing of best practices in business ethics, corporate social responsibility, anti-corruption and sustainability. Ethisphere's selection criteria and the complete list of 2014 World's Most Ethical Companies can be found at <http://ethisphere.com/wme>.

About Alyeska Pipeline

For 36 years, Alyeska has operated the 800-mile Trans Alaska Pipeline System (TAPS), safely moving oil from Prudhoe Bay on the North Slope of Alaska south to the Port of Valdez, the northernmost ice-free port in the United States. The pipeline traverses three mountain ranges, permafrost regions and 34 major rivers and streams. Alyeska personnel work in Anchorage, Fairbanks and Valdez and at pump stations and response facilities all along the pipeline. They also operate the Ship Escort/Response Vessel System (SERVS) for Prince William Sound. Alyeska was created to construct, operate, and maintain TAPS for owner companies which today are BP Pipelines (Alaska), ConocoPhillips Transportation Alaska, ExxonMobil Pipeline Company and Unocal Pipeline Company
